

BETÜL SALİM

Project Management | Technical Delivery, Agile & Stakeholder Coordination

Istanbul, Türkiye | +90 530 765 5292 | betulsalim6@gmail.com | linkedin.com/in/betulsalim
github.com/salimbetul-coder | Portfolio: salimbetul-coder.github.io/betulsalim.github.io | lurentra.com

PROFESSIONAL PROFILE

Computer Engineering graduate with 2+ years of hands-on experience across software, data and technical delivery, including requirements clarification, sprint coordination, release validation and stakeholder communication. At Everion Consulting, coordinate requirements and delivery for 2 projects across 4 live releases, working between business users and technical teams across 100+ REST APIs and 7 systems. Contributed to an insurance claims analytics project, gaining relevant exposure to claims workflows, segmentation and data-quality KPIs. Founder of Lurentra, owning product scope, priorities, acceptance criteria and release readiness.

CORE COMPETENCIES

Project Management: Requirements gathering, scope definition, work breakdown, sprint planning, milestone tracking, task prioritization, risk/issue follow-up, release coordination, Agile/Scrum and cross-functional delivery.

Stakeholder & Reporting: Business-user communication, technical-team coordination, acceptance criteria, requirements documentation, status reporting, KPI tracking, data validation, root-cause analysis and presentation of findings.

Technical & Analytical: Excel, SQL, Python, PostgreSQL, REST APIs, Git/GitHub, Swagger/OpenAPI, Postman, React/Next.js, Django/DRF, FastAPI; strong understanding of software delivery and system dependencies.

PROFESSIONAL EXPERIENCE

Founder & Product Engineer | Lurentra

Jul 2026 – Present

- Own end-to-end product scope and delivery for a sales/collections analytics SaaS; translate business needs into prioritized requirements, user journeys, acceptance criteria and release-ready work items.
- Coordinate web, API, database and QA dependencies; track delivery readiness, defects and risks across features from planning through demo/pilot release, keeping scope and expected outcomes aligned.
- Established release-quality controls with 536+ backend tests and 19 Playwright E2E scenarios; document expected behaviors, validate critical flows and drive issue resolution before release.

Backend & Data Developer | Everion Consulting

Aug 2025 – Present

- Coordinate requirements and sprint delivery for 2 projects across 4 live releases; bridge business users with frontend, mobile and backend teams, convert requests into trackable tasks and validation criteria, and follow blockers through release.
- Contributed to an insurance claims analytics project by translating operational needs into segmentation, action recommendations and data-quality KPI logic; validate outputs with business requirements and investigate inconsistencies.
- Built 29+ operational reports across 800–20,000-record datasets and reduced a complex report to ~4 seconds through SQL/query redesign; use reporting and root-cause analysis to support performance monitoring and decision-making.

ADDITIONAL EXPERIENCE

Backend Developer | Sampaş Bilişim

Dec 2024 – Jun 2025

- Delivered C#/NET Core APIs for municipal applications; collaborated on requirements, React integration, validation and issue resolution within an Agile development team.

Backend Developer Intern | Gamer Arena

Aug 2024 – Dec 2024

- Developed Node.js/MongoDB REST services and collaborated with developers on feature delivery, debugging and release-related technical issues in a live digital product environment.

IT / Data Support, Part-time | HD Holding

Dec 2023 – Jul 2024

- Reconciled SAP ERP inventory data using SQL and Excel, investigated operational inconsistencies and coordinated with internal users to resolve recurring data issues.

SELECTED PROJECT EXPERIENCE

Hasarlink | Insurance Claims Analytics: Supported requirements and delivery for claims-related segmentation, action recommendation and data-quality KPI workflows; translated operational needs into implementable logic and validated results with business expectations.

Field Tracking Platform | Requirements & Release Coordination: Worked across Businesses, Visits, Tasks, Targets, Notifications and Reports modules; converted requests into sprint-ready tasks, coordinated dependencies and validated frontend/mobile behavior against backend services.

EDUCATION & LANGUAGES

B.Sc. Computer Engineering | Nişantaşı University, Istanbul | 2021–2025

Turkish: Native | English: Intermediate (B1)
